Introduction to the training Programme

Maritime Law is a unique field of law that renders a great impact on the everyday life of the people. In today's world, no country can work in isolation and maritime law enables countries to connect. As 90% of global trade depends upon ships, a great deal of emphasis has to be laid on the regulations governing the sea. It is a little known fact that a ship can be operated from one country, flagged for operational reasons to another and then has crew from yet another nation. This makes the domain of Shipping law more intricate, yet exciting to pursue as a professional. Increasing work in the maritime space because of reasons like ship arrest, cargo claims etc. provides excellent opportunities. Seven days Training Program is aimed to cover wide range of areas related to maritime law including Shipping Contract, Marine Environment, Marine labour law, Admiralty law etc.

Importance of Training Program

The new Admiralty Jurisdiction Act expressly vests admiralty jurisdiction in the High Courts of all the coastal states in India including Gujarat High Court which makes this course more so important for the practicing advocates in Gujarat. This course will make the participants aware of legal framework governing maritime sector. It will equip participants with knowledge on contemporary and advance issues related to maritime sector. The training course would be ideal for students and professionals aiming to be specialist in the shipping and maritime domain.
